

Quality aluminium boats

Offering a forward thinking approach, [aluminium boats for sale](#) has gained wide recognition across the commercial and industrial marine industry for its mission to commission projects to the highest standard, in a safe and environmentally responsible way.

Gliseris is a Lithuanian company that designs, builds and distributes aluminum boats for the professional offshore market. Gliseris has over 20 years of experience in building sport boats, workboats, Ribs and landing crafts. All boats produced at Gliseris are built according to the latest CE regulations and the aluminum used carries the Marine Qualification.

The Lithuanian craftsmanship at Gliseris means that we only produce the highest quality vessels with excellent sailing characteristics. All boats are built with the necessary classifications, according to your specifications and will be delivered with accessories of the latest designs and engines.

Our extensive experience in boatbuilding means that we can also build custom made boats, according to our client's requests. Gliseris offers the best designs and prices for all companies like the yachting, navy, dredging, rescue, offshore and many more.

At Gliseris, we take pride in our products and provide you with everything you would need, including maintenance and repairs!

Browse around on our site for more information about our products, services and prices. For any question, please do not hesitate to contact us.
